ENGLISH

Thank you for purchasing this Waterpik® shower head. This booklet gives you the information for a quick and easy installation. You are minutes away from enjoying a powerful and invigorating shower experience with your new Waterpik® shower head.

You can view more information about Waterpik® shower head products at waterpik.com.

TOOLS NEEDED

- Gather the tools to install the shower head.

Adjustable Wrench or Pliers (not included)

BEFORE INSTALLATION

- Remove old shower head and all pipe tape from pipe.
- Pipe tape is not required for installation of this shower head.
- Make sure that washer from old shower is not remaining in pipe. Use a thin utensil such as a pencil or screwdriver, to check inside pipe for old washers. **Do not use your fingers.**

COMPONENTS

INSTALLATION

- Slide the large nut over the pipe so that it rests on horizontal part of the pipe and is clear of the threaded end.
- Thread the pivot ball onto the pipe by hand.
- With an adjustable wrench or pliers, tighten pivot ball an additional ¼ to ½ turn. **DO NOT OVER-TIGHTEN!**

- Hold the bracket up to pivot ball and thread the large nut to the bracket and tighten as shown. The large nut tightens when turned clockwise as viewed from the front of the bracket.
- Connect either end of the hose to the bottom of the bracket by turning clockwise. Hand tighten.
- Connect other end of the hose to the handle of the shower head and hand tighten.
- Place the hose connector and handle into the bracket as shown.

OPERATION

EasySelect® Spray Selector

Spray pattern is controlled by a rotating ring on the handle. Rotate selector in either direction to control pattern.

5 Spray Settings

PowerPulse Massage® Powerful massaging streams shown to deliver muscle tension relief and rejuvenation.

PowerSpray™ Escape the day's tensions as the powerful pulsating massage invigorates your entire body.

Full Body Envelops your body in a comfortable spray for everyday luxury.

Bliss Mist Luxurious dancing droplets of water that feel amazing on the skin.

Water saving trickle Use water-saving trickle to conserve water, while you lather, shave, or shampoo.

Vacuum Breaker Backflow Prevention

Note: Several U.S. state and local municipal plumbing codes require the use of a backflow prevention device when installing a hand shower. This device is termed a vacuum breaker. If your hand shower includes a vacuum breaker it will be located in the hose, and the hose end with the vacuum breaker will include a sticker that reads "attach this vacuum breaker end to shower bracket." If the hose is not installed in this manner, water will not flow. If your hand shower does not include a vacuum breaker, and you would like to obtain one free of charge, please contact us at **1-800-525-2774** (U.S. calls only) and request part number 20009558.

WARNINGS:

- To avoid hot water dangers and conserve even more energy, make sure your water heater is set at 48.9°C /120°F or below.
- Test the tub/shower water with your hand before bathing.
- For additional safety for Ecoflow® or high efficiency shower heads, it is recommended that all homes have installed a pressure balance tub and shower valve with the rotational limit stops properly set by a plumber. If you are unsure of your valve type consult your plumber.
- Always ensure the handheld shower head is properly placed in the bracket, so as to prevent the shower head from falling.

- Do not pull on or tug the flexible hose. This may result in the shower head coming loose and falling.

- For external use only.** The potentially deadly amoeba, *Naegleria fowleri*, may be present in some tap water or unchlorinated well water.

CARE AND CLEANING

- To maintain proper working conditions cleaning is required when mineral deposits appear on spray orifices. To clean mineral deposits, gently rub rubber nozzles on face of shower head to dislodge.
- To clean heavier deposits, remove shower head and soak face down in 1-2 cups of white vinegar (use white vinegar only) for 2-3 hours. Replace shower head and run in each spray setting to flush out vinegar.
- Do not clean or rinse any part with harsh chemicals, heavy duty cleaners, or abrasives; this may damage parts or finish and voids warranty.**
- Clean filter screen in the bracket by unscrewing it from the pivot ball. Rinse by back flushing to remove particles. Re-install filter screen, washer and follow steps 2-5 under installation to re-install shower head.

TROUBLESHOOTING GUIDE

Problem	Solution
No water flow from shower head	a Confirm previous shower washer is not in shower pipe. b Confirm there is only one washer in connection. c Check both hose ends to clear any blockage.
Leaking at the pipe connection	a Confirm only one washer is seated in pivot ball. b Grate bar of soap across shower pipe threads to act as a sealant.
Leaking from hose connection	a Check hose ends to make sure washers are present and connections are tight.
Low water pressure or missing spray patterns	a Clean filter screen (located in pivot ball). b Clean shower head in vinegar/water solution. (See care & cleaning section).

LIMITED LIFETIME WARRANTY

Save your receipt as proof of purchase is required for warranty action. Water Pik, Inc. warrants to the original purchaser of this product that it is free from defects in material and workmanship for as long as the original purchaser owns this product. Water Pik, Inc. will replace the product, which in our opinion is defective, provided that the product has not been abused, misused, altered or damaged after purchase. This includes damage due to use of tools or harsh chemicals. In the event an item has been discontinued, Water Pik, Inc. will replace with what it deems to be the closest product. Water Pik, Inc. is not responsible for labor charges, installation, or other consequential cost. The responsibility of Water Pik, Inc. shall not exceed the original purchase price of the product. This warranty gives you specific legal rights. You may also have other rights that vary depending on where you reside.

Limitation of Liability: This limited warranty is your sole remedy against Water Pik and it shall not be liable for any damages, whether direct, indirect, incidental, special, consequential, exemplary or otherwise, including but not limited to property damage, arising out of any theory of recovery, including statutory, contract or tort.

BINDING ARBITRATION AND WAIVER OF RIGHT TO ASSERT MATTERS IN COURT AND RIGHT TO JURY TRIAL

By purchasing, installing, or using this product you agree that any controversy or claim arising out of or relating to your purchase, use,

modification, installation, or removal of this product shall be settled by binding arbitration. The arbitrator's decision will be final and binding. Judgment on the award rendered by the arbitrator may be entered in any court having jurisdiction over the matter. Further, you agree that you will not have the right to litigate any claim arising out of or in relation to your purchase, use, modification, installation, or removal of this product in any court or to have a jury trial on that claim.

Arbitration of any matters shall be administered by the American Arbitration Association and conducted by one arbitrator in accordance with the consumer arbitration rules of the American Arbitration Association in effect at the time of filing of the demand. The venue for all such arbitrations shall be Colorado and any such arbitration shall be subject to the Federal Arbitration Act and Colorado law.

WAIVER OF RIGHT TO PARTICIPATE IN CLASS ACTIONS OR PURSUE CLAIMS IN A REPRESENTATIVE CAPACITY.

Further, by purchasing, installing, or using this product you agree that arbitration must be on an individual basis. This means neither you, nor we, may join or consolidate claims in arbitration by or against other purchasers or users of Waterpik® products or the general public. Additionally, you may not litigate in court or arbitrate any claims as a representative or member of a class or in a purported representative capacity on behalf of the general public, other purchasers or users of this product, other persons or entities similarly situated, or in a private attorney general capacity.

If product malfunctions or becomes damaged, stop use immediately and contact Water Pik, Inc. for assistance.

FRANÇAIS

Nous vous remercions pour l'achat de cette douchette Waterpik®. Ce manuel vous fournira les informations nécessaires pour une installation facile et rapide. Vous allez bientôt pouvoir profiter d'une douche énergisante et revitalisante grâce à votre nouvelle douchette Waterpik®.

Pour plus d'informations sur les produits de douchage Waterpik®, consultez le site Internet waterpik.com.

OUTILS NÉCESSAIRES

- Regrouper les outils nécessaires à l'installation de la douchette.

Clef à molette ou pince (pas inclus)

AVANT INSTALLATION

- Retirer l'ancienne douchette et enlever entièrement l'adhésif de la tuyauterie.
- Veiller à ce que le joint de la douchette existante n'ait pas été oublié sur le tube d'alimentation. Utiliser un ustensile mince tel qu'un crayon ou un tournevis pour vérifier qu'aucune rondelle ne se trouve à l'intérieur du tuyau. **Ne pas utiliser les doigts.**

COMPOSANTS

INSTALLATION

- Enfiler le gros écrou sur le tube d'alimentation; placer l'écrou sur la partie horizontale du tube d'alimentation, au-delà de l'extrémité fileté.
- Visser manuellement la boule d'articulation sur le tube d'alimentation.
- Avec une clef à molette ou pinces, effectuer le serrage final de la boule d'articulation (¼ à ½ tour). **NE PAS TROP SERRER!**

- Maintenir le dispositif de commande de puissance sur la boule d'articulation puis enfiler le gros écrou sur le support et resserrer comme montré. Le gros écrou se resserre en tournant dans le sens horaire, tel qu'on peut le voir depuis l'avant du support.
- Raccorder n'importe laquelle des extrémités du tuyau à la partie inférieure du support en tournant dans le sens horaire. Serrer à la main.
- Raccorder l'autre extrémité du tuyau au manche de la douchette, puis serrer à la main.
- Placer le raccord de tuyau et la poignée dans le support, comme illustré.

UTILISATION

Sélecteur du mode d'aspersion EasySelect®

La rotation (dans un sens ou dans l'autre) d'une bague sur la poignée de la douchette permet la sélection du mode d'aspersion.

5 modes d'aspersion :

PowerPulse Massage® : De puissants jets massants qui soulagent les tensions musculaires et revitalisent.

PowerSpray™ Libérez-vous de toutes les tensions de la journée avec un puissant massage à jets pulsés aux effets revigorants sur tout le corps.

Corps entier Enveloppe votre corps de jets agréables pour une douche des plus somptueuses chaque jour.

Fines gouttelettes apaisantes Un jet exquis de fines gouttelettes d'eau dansantes qui procurent une incroyable sensation sur la peau.

Ruissellement économiseur d'eau Utilisez le ruissellement économiseur d'eau pour économiser l'eau pendant que vous vous savonnez, vous vous lavez les cheveux ou vous vous rasez.

Prévention de reflux avec brise-vide

Remarque : Plusieurs codes de plomberie fédéraux et municipaux locaux des É.-U. requièrent l'installation d'un dispositif de prévention de reflux pour l'installation d'une douchette manuelle. Ce dispositif est connu sous le nom de brise-vide. Si la douchette manuelle comprend un brise-vide, celui-ci se situe dans le tuyau et l'extrémité du tuyau avec le brise-vide comporte un autocollant sur lequel est inscrit « raccorder cette extrémité du brise-vide au raccord de douche ». Si le tuyau n'est pas installé de cette manière, l'eau ne coulera pas. Si la douchette manuelle ne comprend pas de brise-vide et que vous souhaitez en obtenir un sans frais, veuillez nous contacter au **1-800-525-2774** (uniquement pour les appels provenant des É.-U.) et demandez la pièce n° 20009558.

AVERTISSEMENTS :

- Afin de conserver encore davantage d'énergie et d'éviter les dangers liés à une eau trop chaude, s'assurer que votre chauffe-eau soit réglé à une température maximale de 48,9°C / 120°F.
- Tester la température de l'eau de la baignoire/douche avec la main avant de se baigner.
- Pour plus de sécurité, l'installation (dans n'importe quel domicile) **EN FRANÇAIS AU VERSO**
